## Amendments to the Specification

Please replace the paragraph at page 7, beginning at line 26, under the heading <u>SUMMARY OF</u> <u>THE INVENTION</u> with the following:

According to the invention, there is provided a hybrid maize plant, designated as 33A72, produced by crossing two Pioneer Hi-Bred International, Inc. proprietary inbred maize lines GE492041 and GE568051. These lines, deposited with the American Type Culture Collection, (ATCC), Manassas, Virginia 20110, have accession number [\_\_\_\_\_] PTA-1308 for GE492041 and accession number [\_\_\_\_\_] PTA-5526 for GE568051. This invention thus relates to the hybrid seed 33A72, the hybrid plant produced from the seed, and variants, mutants and trivial modifications of hybrid 33A72. This invention also relates to methods for producing a maize plant containing in its genetic material one or more transgenes and to the transgenic maize plants produced by that method. This invention further relates to methods for producing maize lines derived from hybrid maize line 33A72 and to the maize lines derived by the use of those methods. This hybrid maize plant is characterized by high yield with good brittle snap resistance.
